DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/13/07 has been entered.

Election/Restrictions

Claims 56 and 58 were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species B shown in figure 8 in the action mailed on 1/29/07 (see cover sheet section 4a). Applicant is required to correct the prefix to read "withdrawn" for both claims 56 and 58.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-13, 17, 21, 22, 25-27, 30-45, 50-55, 57, 59, and 60 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that

Art Unit: 3738

the inventor(s), at the time the application was filed, had possession of the claimed invention. The independent claims recite that the implant is "uniplanar", but there is no recitation of this anywhere within the specification nor is it clear from the elected figures 10 and 11.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-13, 17, 21, 22, 25-27, 30-55, 57, 59, and 60, are rejected under 35 U.S.C. 102(b) as being anticipated by Dahan (USPN 5,078,742).

With reference to Figures 1 and 2 Dahan discloses a biconvex intraocular lens comprising a single optic 12 having anterior and posterior sides and multiple plate haptics 14 and 16 extending from the edge of the optic. The haptics have a thin groove portion 18 adjacent the optic that enables the optic to move anteriorly and posteriorly. In Figure 1 it is clear that the lateral edges of haptics are tapered inwardly from the haptic. Dahan further discloses protuberances 28 that extend laterally anteriorly, posteriorly and laterally from the haptic.

Response to Arguments

Applicant's arguments with respect to claims 9-13, 17, 21, 22, 25-27, 30-55, 57, 59, and 60 have been considered but are moot in view of the new ground(s) of rejection.
